Interested in programming? Like to read about programming without seeing a constant flow of technology and political news into your proggit? That's what /r/coding is for. A pure discussion of programming with a strict policy of programming-related discussions.. As a general policy, if your article doesn't have a few lines of code in it, it probably doesn't belong here.

A relational database is a digital database based on the relational model of data, as proposed by E. F. Codd in 1970. A software system used to maintain relational databases is a relational database management system (RDBMS). Many relational database systems have an option of using the SQL (Structured Query Language) for querying and maintaining the database.
