A theory is a rational type of abstract thinking about a phenomenon, or the results of such thinking. The process of contemplative and rational thinking often is associated with such processes like observational study, research. Theories may either be scientific or other than scientific (or scientific to less extent). Depending on the context, the results might, for example, include generalized ...

Playing games with theory. Playing games can be particularly helpful at addressing student anxiety about using theory in practice. Playing games in supervision is unusual, so it often stands out for students as a learning activity and students generally report remembering these for much longer than any discussions in supervision.

The present disambiguation page holds the title of a primary topic, and an article needs to be written about it. It is believed to qualify as a broad-concept article. It may be written directly at this page or drafted elsewhere and then moved over here. Related titles should be described in Group, while unrelated titles should be moved to Group (disambiguation).
