Glow plugs effectively work as electric heaters in the combustion chamber, and repeated use over a number of years can reduce their effectiveness. A typical sign of defective glow plugs is a lengthier start-up process for the engine. If you notice that it is taking even a couple of seconds longer than it normally does to start your engine, your glow plugs probably need replacing. Get a ...

Tensioners prevent slackness in the belt, while idler pulleys guide the drive belt and route it around ancillary features like the water pump and alternators. Meanwhile, dampers work with the idler pulleys to help maintain tension and prevent the belt from coming loose. If any of these components becomes worn or fails, it could cause serious problems with the engine. Often, the first warning ...
